

A black and white advertisement for Caffinol. The background is a dark, textured surface, possibly a wall or ceiling, with numerous small, dark spots and a large, irregular hole on the right side. In the lower portion of the image, a cityscape is visible, showing several buildings with windows and a prominent tower-like structure. The word "Caffenol" is written in a white, elegant, cursive font across the center of the image.

Caffenol

This zine documents my first experiment with Caffenol

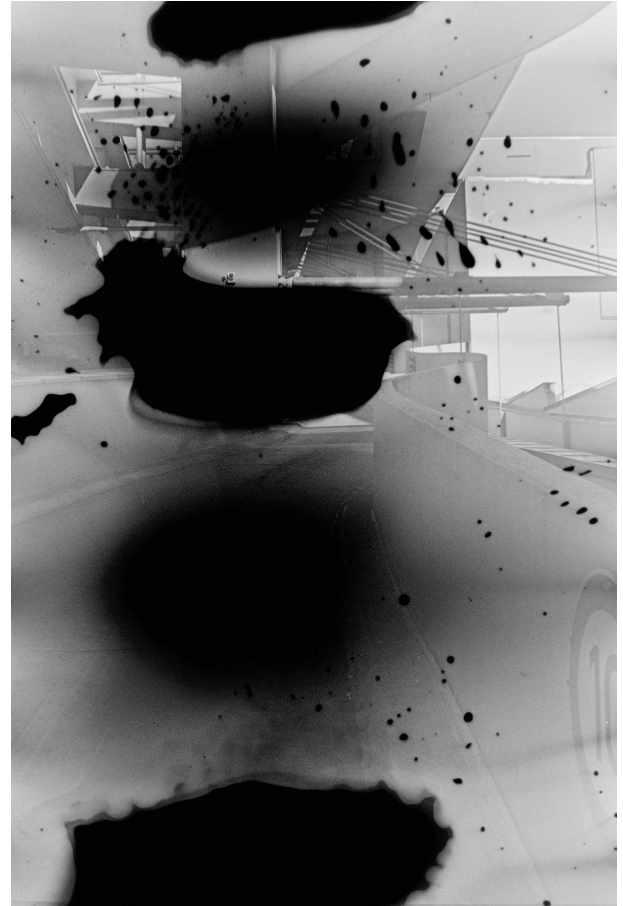

Caffenol is a DIY instant-coffee based developer which allows us to develop black and white analog film.

I used the following formula:

- 1000ml of tap water
- 40g instant coffee
- 56g washing soda
- 16g Vitamin C powder

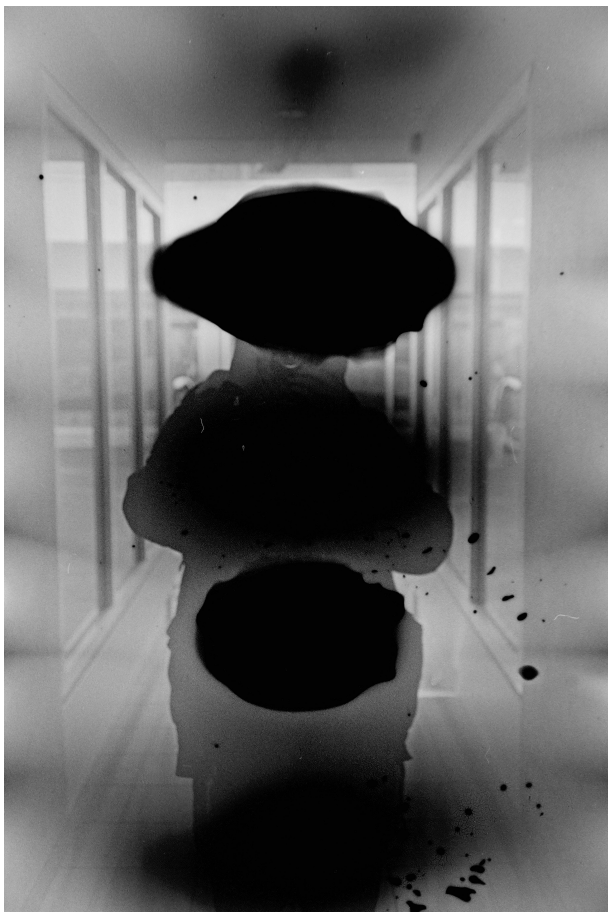

I dissolved all ingredients individually in three cups and then poured them into a water bottle.

The development was done in a thermos bottle, this is the reason the images didn't develop cleanly and have black marks.

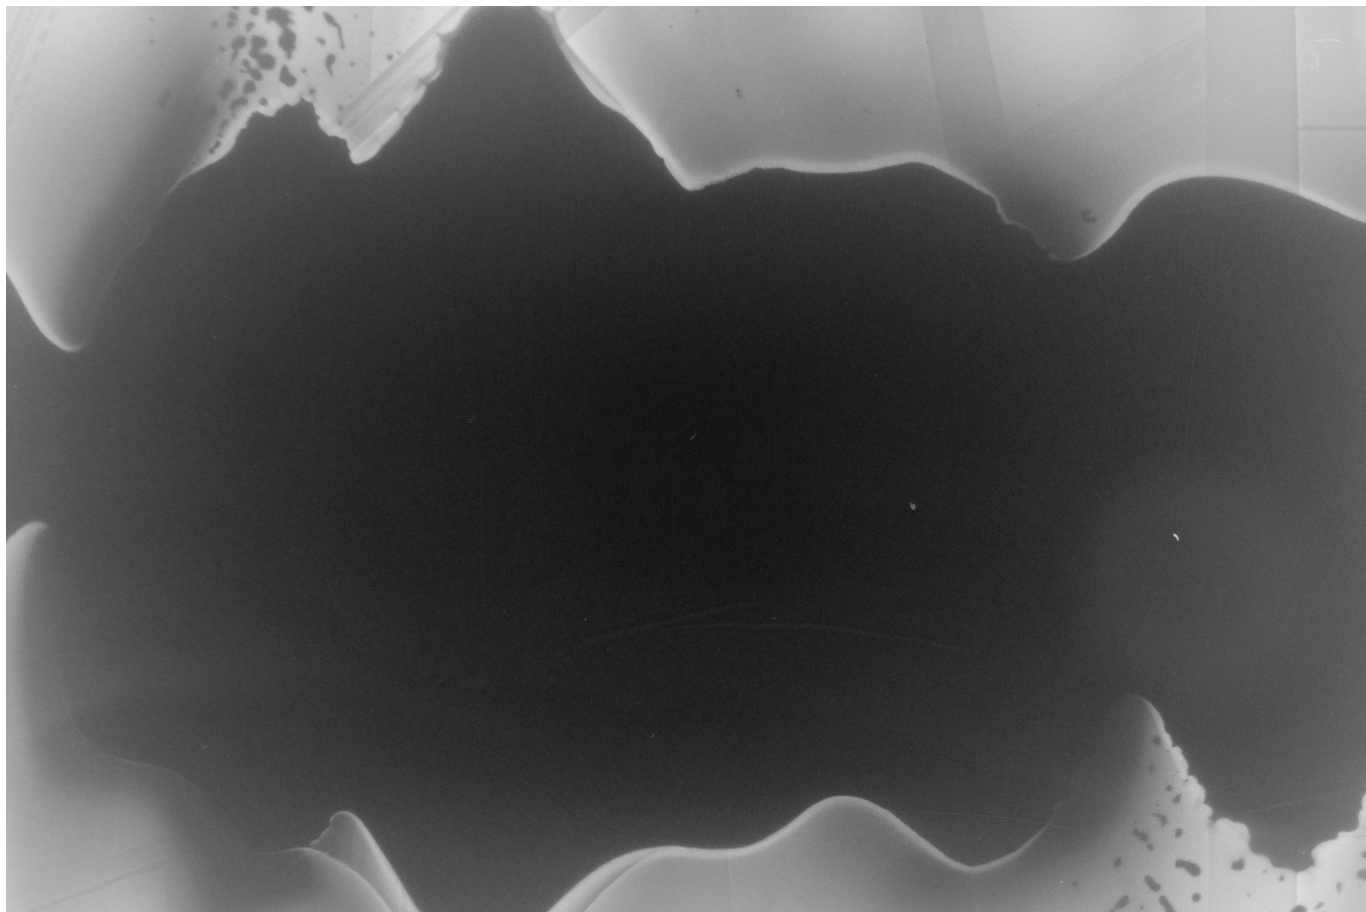

Film: Agfa APX 100
ISO: 100
Camera: Konica C35 EF3

Developed in Caffenol
